Professional Service to Keep Your Plumbing System Flowing Smoothly

EMCOR Services Scalise Industries' reliable, responsive plumbing services are performed by fully licensed experts, who are certified in the tri-state area to provide a full range of plumbing services, including specialty gas line fusing and medical gas system installation. We can help keep your drainage and sewage systems trouble free, while satisfying the most stringent local health and safety regulations.

Since 1946, EMCOR Services Scalise Industries has built a reputation for delivering outstanding, customer-focused mechanical, electrical, and fire protection services to both commercial and institutional clients alike. Applying expertise and trade knowledge acquired during our many years in the industry, Scalise's mission is to continually enhance the value we bring to customers on every project, regardless of size or complexity.

Custom-Tailored Plumbing Systems

Using the latest in innovative technology, our licensed and certified plumbing technicians can simulate a building's peak demand periods to properly size and route supply and disposal piping systems. This technology helps us provide customized plumbing solutions that are tailored to accommodate your facility's unique space requirements, existing piping systems, and all current equipment.

Effective Prevention, Rapid Solutions

Our plumbing experts can also check your line's location and condition with video cameras for effective preventive maintenance, as well as rapid problem identification and resolution. When obstructions do occur, we have a complete assortment of auger sizes to clear your system quickly and get it flowing smoothly again. Our goal is always the same— to service, maintain, and ensure the reliability of your facility's plumbing systems.
