

**PREFABRICATION
SOLUTIONS**

State-of-the-art Fabrication Services for Every Project

EMCOR Services

Scalise Industries

EMCOR Services Scalise Industries (ESSI) offers customized sheet metal and piping prefabrication solutions for all of our construction projects. We maintain a state-of-the-art shop with thousands of square feet of fabrication and warehouse space, where **we produce tailored components for mechanical projects in virtually every major market.**

Custom Solutions for Productive, High Quality Projects

Because prefabrication takes place in a controlled environment, it can help significantly reduce installation time and increase labor productivity. Standardized work processes and automated equipment also reduce build variation, helping to ensure outstanding quality. ESSI utilizes BIM to identify opportunities for prefabrication early in the project lifecycle, helping avoid long lead times on equipment and allowing us to utilize the model in the fabrication process itself. Additionally, by minimizing time spent on the jobsite, prefabrication also helps us

fulfill our commitment to workplace safety. Even something as simple as unboxing materials ahead of time can keep waste off the jobsite, helping promote safety and leading to cost savings.

Fabrication Services

- > Mechanical fabrication
- > Commercial and industrial HVAC ductwork
- > Piping assemblies
- > Plasma cutting
- > Tube bending
- > Pulse arc and orbital welding
- > Plumbing systems and components
- > Modular, skid-mounted equipment
