

**BOILER
MAINTENANCE**

EMCOR Services

Scalise Industries

Programs to Prepare your Equipment for Every Season

During the winter months, your boiler is one of the most important pieces of mechanical equipment in your facility and it is vital that a **comprehensive maintenance check** is performed before the season arrives. At EMCOR Services Scalise Industries, our factory-trained boiler technicians are equipped to perform **end-to-end maintenance, review, and repairs for boilers** at virtually every type of commercial and industrial property.

From Planned Replacement to Emergency Repair— We've Got It Covered

Determining if it is time to replace a boiler is a difficult, expensive decision. We can help guide you through the process and decide whether service, upgrade, or replacement is the right option for your system, facility, and budget. If the worst happens, and equipment does unexpectedly fail, we offer rental solutions and rapid, emergency service to help get your boiler up and running in as little time as possible.

Chiller Services. Second to None.

We offer a variety of boiler maintenance services and operational checks that can help prevent common boiler issues, promote equipment lifespan, improve system efficiency, and, most importantly, avoid failure.

Our experienced technicians can:

- > Verify operation and combustion efficiency of single or dual fuel
- > Check all fuel safety circuits
- > Train facility personnel on boiler basics and how to change over to a secondary fuel

A FULL-RANGE OF BOILER EXPERTISE AND EXPERIENCE

Heating boilers

Water boilers

Process boilers

Low- and high-pressure steam boilers

Sectional boilers

Fire and water tube boilers

- > Check fuel levels to ensure they can sustain a three-day run period, at minimum
- > Perform end-to-end preventive maintenance
- > Run computer-generated burner firing optimization processes
- > Perform custom corrosion treatment

THAT RESPONSIVE. THAT EXPERIENCED.
